February 2025

Desktop App to retrieve up to 200 classes

For teachers / administrators

What's new?

This update was developed to address a previous limitation whereby only 100 classes were retrieved in the Desktop App compared to 200 classes in the Webapp (a mix of active, ended, and expired classes). As a result, users using the Desktop app with more than 100 classes with readable materials wouldn't be able to see all of them.

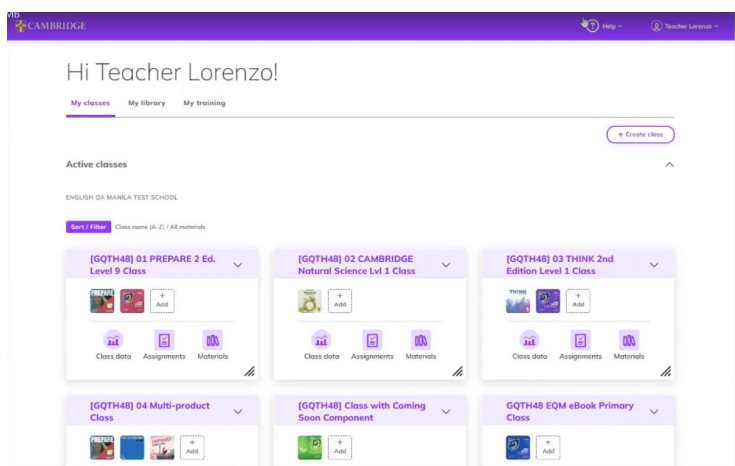

The benefits

Desktop App users will now have the same experience as in the Webapp and will be able to retrieve up to 200 classes. Users with this number of classes will be Teachers and most likely Administrators.

How does it work?

Up to 200 classes will be retrieved in the Desktop App. These classes will be retrieved automatically in the Desktop App My Classes section, the user will be able to scroll down through the 200 classes and chose any of them.

How it looks

To find more information on how to access classes in the Desktop app please Visit the FAQ on [Cambridge One here](#).
