Editing assignments

For teachers

What's new?

Teachers can now edit all elements of an assignment they have set. This capability allows them to change:

- Assignment content: the selection of activities/test
- Assignment details: assignment name, start and due date and time
- Students: the selection of students the assignment is set for

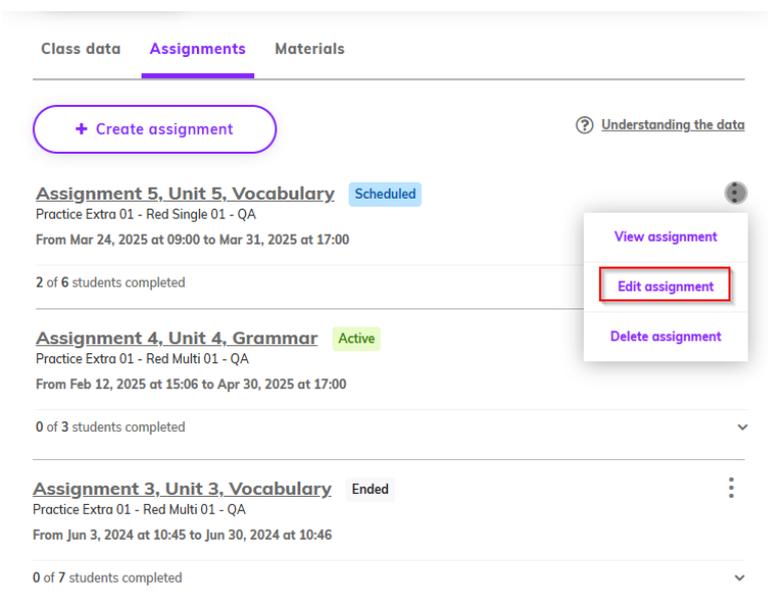

The benefits

The capability allows teachers to:

- Correct any errors they made while creating an assignment without the need to delete and recreate it.
- Adjust the assignment based on new information, such as learner progress.

How does it work?

The feature can be accessed by selecting the 'Edit assignment' option on the three-dot menu for each assignment on the teacher's class Assignment tab.

Assignment content to change the activities.

Assignment details to change the assignment name, or start/due date and time.

Students to change who should be set the assignment.

Once all changes have been made, the 'Update' button should be selected. The summary screen will then display an 'Edited' label next to the updated sections.

It is possible to continue to different sections if further edits are needed.

After making all changes, the 'Assign' button on the summary screen should be selected to apply them.
