Copying school and class keys

For teachers / administrators

What's new?

Teachers and Administrators can now copy school and class keys at the touch of a button.

The benefits

School and class keys can be copied more quickly and easily, which will help teachers and administrators share them with colleagues and students more effectively.

How does it work?

Teachers and Administrators should select the 'Copy' button next to each school or class key to copy the code to their clipboard.

How it looks

From the Administrator's dashboard, you can copy the school key at the top of the page:

Or class keys from the class list:
