

## ELO Academy - English Learning Online Kingdom of Saudi Arabia

“

**Cambridge One has helped me transform my teaching by providing a variety of tools and teaching resources.**

Muhammad Shujaat

**I have recently set up ELO Academy - English Learning Online. We specialise in teaching online only. Currently, we have around 70 students enrolled in IELTS and English Speaking courses. I was lucky enough to have already completed the best Cambridge qualifications such as Cambridge CELTA, Delta, TKT and several others.**

### Your students

We teach Upper Secondary (approximately 15 to 18), University (18 and over) and Adult Education Programmes (18 and over). Students come with expectations to attend our courses and improve their English for work or studies.

### How do you use Cambridge One?

I use all levels from beginner to advanced. Initially, students go through a placement test to put them in the right level. During their course they receive regular support and information about their progress, and are

required to complete the end of course assessments before moving to the next level. With Cambridge One I can create classes, control how and when students access the content, and assign new assignments and assessments as teachers deem fit.

### Which features do you use?

We use the test generators, the digital presentations (Presentation Plus), as well as other teacher resources on the platform. I use the different features such as auto correction, controlling the content, presenting the content in an online class, sharing my screen and asking my students to interact with the presentations.

### What do you like best about Cambridge One?

Cambridge One has helped me transform my teaching by providing a variety of tools and teaching resources. I can choose from world class teaching course books to choosing resources that suit my students. I can also use Cambridge One to flip the class, asking students to log in and respond before class.

### Key facts

- **Muhammad Shujaat, School owner**
- **ELO Academy - English Learning Online, Kingdom of Saudi Arabia.**
- **Students study 3 to 12 hours per week.**
- **Courses used on Cambridge One**
  - [Mindset for IELTS](#) (student's 15-18)
  - [Evolve](#) (adults)

“

**My teaching has become more efficient, and the results have improved. I was able to market my courses more thanks to the great results of my students.**

Muhammad Shujaat

### **What impact has Cambridge One had on your teaching?**

My teaching has become more efficient, and the results have improved. I was able to market my courses more thanks to the great results of my students.

### **In what ways have your students benefitted from using the platform?**

Students have mostly benefited from timed assignments and feedback. What has helped them most is perhaps the after-class support that the online workbooks provide. Students have a wealth of resources at their disposal. They could respond to the assignments; attempt follow up tasks and get differentiated instruction.

I have been working with very low level and advanced students. I use the resources to get them to read regularly and use the videos to challenge them.

### **Do you use any of the built-in course assessment?**

The ongoing built in course assessments help because students get all the support they need, and they are helped by the auto-correction.
